

dm3

Decentralized, Secure and Open Messaging Protocol

Heiko Burkhardt

Lead developer, corpus.ventures

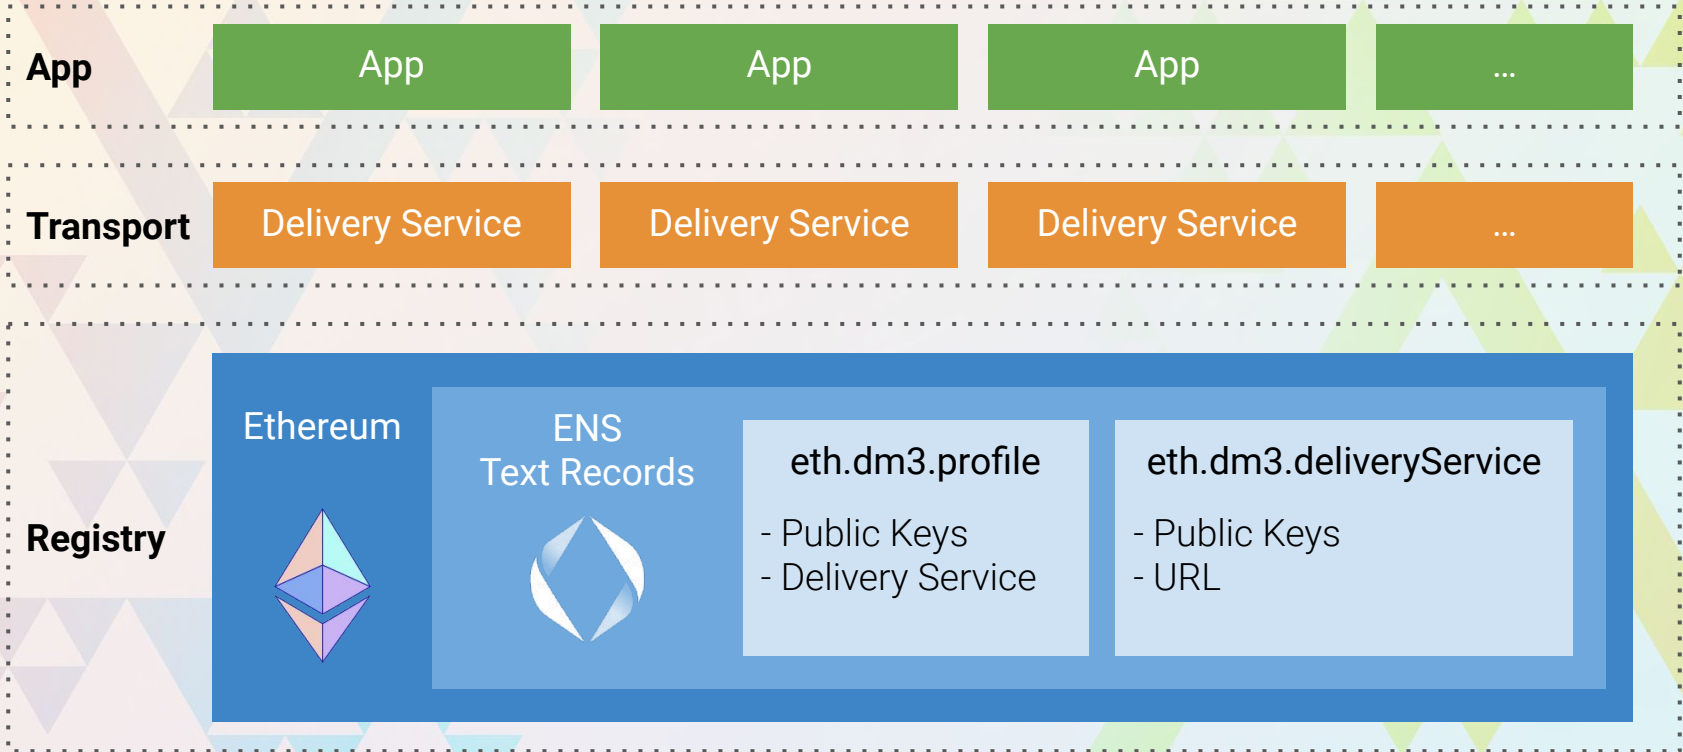

What is dm3?

dm3 is a **simple** protocol enabling
decentralized, open, and secure
messaging
using established web3 services.

- Censorship Resistance
- No single point of failure
- Users are in control of their data
- Everyone can write an own implementation

Architecture

Registry

bob.eth

eth.dm3.profile

```
{
  "publicEncryptionKey":
    "nyDsCsG+pK...D=",
  "publicSigningKey":
    "MBpqhsSk9r...c=",
  "deliveryService":
    ["example-ds.eth"],
}
```

example-ds.eth

eth.dm3.deliveryService

```
{
  "publicEncryptionKey":
    "nyDssG+pK...D=",
  "publicSigningKey":
    "MBpqhxe9r...c=",
  "url":
    "https://ex-ds.xyz"
}
```

alice.dm3.eth

CCIP (EIP-3668)

eth.dm3.profile

{...}

Off-Chain or L2

Registry

bob.eth

```
eth.dm3.profile
{
  "publicEncryptionKey":
    "nyDsCsG+pK...D=",
  "publicSigningKey":
    "MBpqhsSk9r...c=",
  "deliveryService":
    ["example-ds.eth"],
}
```

example-ds.eth

```
eth.dm3.deliveryService
{
  "publicEncryptionKey":
    "nyDssG+pK...D=",
  "publicSigningKey":
    "MBpqhxe9r...c=",
  "url":
    "https://ex-ds.xyz"
}
```

alice.dm3.eth

CCIP (EIP-3668)

```
eth.dm3.profile
{...}
```

Off-Chain or L2

Registry

bob.eth

eth.dm3.profile

```
{
  "publicEncryptionKey":
    "nyDsCsG+pK...D=",
  "publicSigningKey":
    "MBpqhsSk9r...c=",
  "deliveryService":
    ["example-ds.eth"],
}
```

example-ds.eth

eth.dm3.deliveryService

```
{
  "publicEncryptionKey":

Reference Implementation Packages

-  **dm3-web:** dm3 web app
-  **dm3-react:** ui component library
-  **dm3-backend:** delivery and storage service
-  **dm3-lib:** basic protocol functions

All of it is open source.

Live at: <https://app.dm3.chat/>

 [corpus-ventures/dm3](https://github.com/corpus-ventures/dm3)

Possible Protocol Extensions

- **Message Access Specification**
Specifies how received messages on a delivery service can be accessed.
- **Message Storage Specification**
Specifies how messages are persisted after they are delivered.
- **Public Message Feed Specification**
Specifies how a public message feed is created and accessed.
- **Group Messaging Specification**
Specifies a protocol extension to enable group messaging.
- **Privacy Onion Routing Specification**
Specifies a protocol extension to enable privacy preserving onion routing.
- **Spam Protection Specification**
Specifies additional methods, based on web3 technology, to prevent spam on the receiver's side.

Here's the roadmap.

Protocol Draft and Reference Implementation

Q3 2022

- Specification version 0.2 published
- Reference implementation

Finalize Protocol

Q4 2022

- Discussion with other protocols/apps and revision
- Finalization (version 1.0) and proposal for ENS-RFP
- Update reference implementation

Join the specification discussion

Adoption

Q1 2023

- Interoperability
- Integration in other apps

Let us know if you want to integrate dm3

Thank you!
