WHAT IS STREAMETH?

It’s a self hosted application that event organizers can use to host their virtual events
Stream, schedule, record
Live video playback

Livestream to multiple rooms concurrently

Failover
Streameth is provider agnostic

Livepeer is the out of the box video provider but you can choose your own
Schedule

Streameth integrates with different schedule providers so that event organizers can easily add or remove session
On demand video playback

Show the recorded content on each session page
Plugins

Extend the functionality of the application

Integrate with other protocols
We are live streaming 9 room at the same time
Web3 events are being broadcasted using centralized providers.

WHY WE NEED STREAMETH?
PROBLEMS

- Censorship prone

SOLUTIONS

- Censorship resistant

It seems that @YouTube (@Google) has banned educational web3 accounts on YouTube including @BanklessHQ, @gabrielhaines and @optimismPBC deleting their content and ability to share information with their audiences. We all need to switch to web3 social to keep our freedom of speech.
PROBLEMS

● Censorship prone

● Intellectual property

SOLUTIONS

● Censorship resistant

● Decentralized providers
PROBLEMS

- Censorship prone
- Intellectual property
- High fees to content creators

SOLUTIONS

- Censorship resistant
- Decentralized providers
- Web3 monetization
**PROBLEMS**

- Censorship prone
- Intellectual property
- High fees to content creators
- The web3 ecosystem

**SOLUTIONS**

- Censorship resistant
- Decentralized providers
- Web3 monetization
- A public good
